Templepatrick Travel Clinic is a private service run on behalf of the GPs within the practice. We are a registered **YELLOW FEVER** centre (a yellow fever vaccination is £70.00) and we can give this vaccine along with other travel vaccines to our patients and also to patients from other practices.

A charge of £25 per person is required for consultation and risk assessment – this does not apply to children under the age of 16 who are registered within our practice. Once your application has been screened the £25 charge may be refunded in certain circumstances. The £25 will cover the price of a private prescription and administration of vaccine if applicable but not the actual cost of vaccinations and medication.

**It is your responsibility to allow plenty of time for a pre-travel consultation at least 4 weeks before leaving.**

Please specify which chemist you wish to collect your scripts from and check with them regarding the availability of the vaccines.

If you wish to have medication with you in case you become ill, these may be prescribed as deemed appropriate by the clinician – however these are not available on an NHS prescription. There will be a charge at the pharmacy for this script.

**PAYMENTS CAN BE MADE BY CASH OF CHEQUE WHICH SHOULD BE MADE  
PAYABLE TO**

**TEMPLEPATRICK SURGERY (TRAVEL).**
